Source of collection:

Gift of Albert W. Rice, 1963

Collection description:

Stephen Carpenter Earle (1839-1913), a native of Leicester, Mass., graduated from M.I.T. and became a prominent architect in Worcester, Mass. Earle designed the Worcester Art Museum, Worcester Polytechnic Institute, Clark University, and several city churches. He published various professional works and was a member of the G.A.R.

James E. Fuller (1836-1901) was a partner with Earle from 1876 to 1891. He remained in Worcester as an architect with several firms and designed the city's YMCA, old Armory Building, and various churches.

The architectural plans for alterations and additions to the Worcester home of Senator George Frisbie Hoar (1826-1904) were drawn up by the firm of Earle and Fuller around 1880. The plans include a detailed list of Specifications of Works and Materials. There are also color drawings of the Oak Avenue residence, such as views of the first story, front elevation, and roof plan.
